

Federal Government Reform Proposal

Updated Structure with AI-Powered ZBB EPM for Public Sector

Prepared by: Frank Crusing

Date: November 10, 2024

Chapter 1: Overall Goal of U.S. Federal Government Reformation

Objective: To streamline federal operations, emphasizing constitutionally mandated functions and ensuring a leaner government structure that focuses on fiscal responsibility, transparency, and accountability.

Chapter 2: Prep Time (November 6, 2024 - January 20, 2025)

Content: Outlines preparatory steps including defining guiding principles, drafting executive orders, briefing on AI-assisted Zero-Based Budgeting (ZBB), establishing communications, and selecting IT contractors.

New Chapter 3: Organizing by Constitutional Mandates and Identifying Agencies to B

Combined Focus: This chapter merges the assessment of constitutionally essential functions (original Chapter 3) with identifying non-essential departments for disbandment (original Chapter 4). It evaluates each department against constitutional criteria to consolidate roles and streamline functions, targeting agencies that lack alignment with core mandates.

New Chapter 4: AI-Powered ZBB EPM for Public Sector

Summary: This chapter introduces an AI-powered Zero-Based Budgeting and Enterprise Performance Management (EPM) system tailored for the public sector. By leveraging AI, the ZBB-EPM framework will analyze spending patterns, optimize budget allocations, and enforce

rigorous performance metrics across departments. This chapter will detail implementation phases, expected outcomes, and necessary compliance standards to maximize federal efficiency and accountability.

Chapter 5: Reforming Regulatory Agencies

Content: Details planned reforms for major regulatory bodies to enhance efficiency, reduce redundancy, and improve transparency. Agencies like the EPA and FDA will be evaluated for potential consolidation and streamlined functions.

Chapter 6: Consolidation of Programs from Disbanded Departments

Content: Outlines strategies for integrating essential programs from disbanded departments into constitutionally aligned entities, improving coordination and operational efficiency.

Chapter 7: Efficiencies Through Subcontracting

Content: Assesses opportunities for outsourcing non-core functions to the private sector, guided by government oversight and defined KPIs to encourage competition and cost savings.

Chapter 8: Timelines

Content: Sets critical timelines for implementation phases, including prep time, the '100 Day War' for foundational changes, and milestone dates, such as the ZBB findings report to Congress.
